Amazing book!Von KundeWow! What a breath taking narration. The author is a master of listening deeply to life's experiences and describing his adventures in Transylvania, Western Europe and the Middle-East in a way, that make you believe you're a part of it!

KurzbeschreibungBased on long and successful international experience of the author, this book is instructive as well as educational regarding some aspects of our modern world. In a certain subtle way, one can even get clues as how to

behave in different cultures than our Western one. From some author related events in the antebellum Romania, over typical situations in the communist period though his escape over Turkey, new experiences in West Germany and up to international construction related activities, this book has picked only some specific experiences to be outlined, sometimes with sarcasm, humor or with sheer incredibility. The behavior of a Soviet occupation officer, a hilarious elementary teacher, working as a blue color colleague with the communists, the quest for escaping the socialist system, some aspects of the new life in the West up to the Abrasudia enterprise with the fear of being trapped by the sharia rules, as well as a witnessed decapitation. These are only some examples of the variety of peculiar situations treated here more detailed, or just touched briefly, but mostly with humor or social satire and afterthought. With the todays enormous influx of refugees from all over the Middle East and the African subcontinent into western Europe, I had a site in Abrasudia may represent a small incentive toward thinking about the actual zeitgeist more seriously
