Recommended readingVon Ulrich KrauseA couple of days ago, a new book arrived on my desk. "IBM Lotus Quickr 8.5 for Domino Administration" was published by Packt Publishing in January 2011."IBM Lotus Quickr 8.5 for Domino Administration" is a step-by-step manual, with explanation from installation and upgrading, to the development and management of Quickr, to what-to-do-next when you finally have everything set up.The book has been written by Lotus Community members Keith Brooks, Mark Harper, David Byrd and Olusola Omosaiye and also the reviewers are well known members of the Yellowverse (Alex Kabasov, Dennis van Remortel). All authors have a deep insight knowledge of IBM Lotus Quickr.I was a bit surprised when reading thru the "Who is this book written for". Business Analysts, Managers ... Yes, it CAN be read by this group of non technical people, but I doubt that this is

the audience the book is really targeting. I have never heard of any Business Analyst or a Manager installing fixpacks and modifying the notes.ini of a Domino server. And, putting my administrator's hat on, I would never allow them to do this tasks. The target audience for this book is clearly a Domino Administrator who wants to install IBM Lotus Quickr. If you as an administrator have never setup an IBM Lotus Quickr server, then this book is for you. All steps from installing the Domino server to applying fixpacks and installing the IBM Quickr server are explained on the first 58 pages of the book. Many screenshots help also those administrators that are not native english speakers. After doing some post installation configuration you will have a running IBM Lotus Quickr installation. Chapter 6 (Managing IBM Lotus Quickr Servers) helps you with the daily administration of your Quickr server. If you already have a running IBM Lotus Quickr installation and you want to upgrade to release 8.5, you could start reading Chapter 7 first. Chapter 7 discusses the process required to upgrade Lotus QuickPlace and Quickr services to the new release 8.5. Be aware that you need to have at least more than only some vague administration skills to get the most out of "IBM Lotus Quickr 8.5 for Domino Administration". I can recommend this book to all Domino Administrators who want to successfully install, run and maintain IBM Lotus Quickr 8.5.

Kurzbeschreibung This is a step-by-step manual, with explanation from installation and upgrading, to the development and management of Quickr, to what-to-do-next when you finally have everything set up. It discusses problems that you might face while upgrading to the latest version. The authors show you how to get the most out of the most important features including installing, configuring, maintaining, and troubleshooting a clustered environment with Lotus Quickr. This is a step-by-step manual for System Administrators and Business Analysts who need to facilitate the effective and efficient performance of diverse teams in an interconnected world. It can also be read by Management to gain a high-level understanding of the new features and capabilities offered by the product. You don't require any knowledge of IBM Lotus Quickr 8.5. This book will teach you everything you need to know.

Keith is a member of the Technical Board of The View magazine and has published a number of articles related to Quickr as well as other Lotus subjects. Lastly, Keith holds certification as an IBM Lotus Quickr and Sametime Administrator. Keith maintains an active blog at <http://blog.vanessabrooks.com>

David Byrd is an IBM Senior Certified Executive IT Architect with IBM Software Services for Lotus from Fayetteville, GA. He has been an IBM/Lotus employee for over 9 years in a number of consulting positions covering various technology areas. David has a deep background in virtually all areas of Lotus products and technologies covering areas ranging from low-level API development and collaborative application architectures, to security architectures and messaging architectures. His current focus is on Lotus Quickr as well as other team collaboration technologies and its deployment within enterprise customers. He has worked with Lotus Notes and Domino for over 15 years.

Mark is a IBM Certified Consulting IT/Specialist with twenty years of experience in messaging and collaboration system implementation and administration. He possesses a strong knowledge of messaging systems with a focus on Lotus Notes/Domino. He has an extensive background with collaboration including Lotus Quickplace and Domino.Doc, and Lotus Quickr. Mark also poses a strong skill set in messaging system migration products and planning. Mark spent 10 years in the IBM Software Services for Lotus before making the move to Sales and Distribution in January of 2007. I would like to thank my Wife Sonia Harper and my two daughters Amber Harper and Bailey Harper for the support in writing this book. I want to thank my Mother LaVada Harper and Father George "Woody" Harper for pushing me to be the best I could be. I want to thank David Byrd for his help and patience in completing this process. I would also like to thank other co-workers and friends who drive me to better myself and grow everyday. Some of those that have helped me along the way are Jeff Pinkston, Ann Marie Darrough, Holly Rush, Lori Clark, Gene Leo, Johnny Smith, Larry Berthelsen, Bob Miller, Carl Radino, Chris Biega, Luis Benitez, Ted Stanton, Carla Gillespie and Steve Hardison.
