Von Marie L. Scott, Gabriella Davis, Thomas Duff : IBM Sametime 8.5.2 Administration Guide before purchasing it in order to gage whether or not it would be worth my time, and all praised IBM Sametime 8.5.2 Administration Guide:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Recommended readingVon Ulrich KrauseIt took me a while to go thru all of the content, but inally I made it and here is my review.IBM Sametime 8.5.2 Administration Guide was written by Gabriella Davis, Marie L. Scott and Thomas "Duffbert" Duff.I have attended sessions by Gabriella Davis and Thomas Duff at several conferences and while reading the book, I sometimes felt like sitting in the audience and hear Gabriella and Tom talking. I never had the chance to meet Marie L. Scott but I'm sure that she is as enthusiastic as the other authors.All of them have a deep knowledge and so is the content of the book.Every detail of the installation and administration is covered and one should be able to setup a Sametime environment following the description in the book step by step. If I only had this book a year ago, it would have saved me a lot of time then.My first installation took me more than a week. One week

with reading documentation, hanging around in forums and chatting with IBMer Frank Altenburg. And a lot of try and error. Be assured that, following the book, you can do the installation in less time. Also, if you are new to Websphere, this book is for you. IBM Sametime is not as easy to setup as double-click a setup.exe and wait. There are many places to look into and numerous properties that can be set or even been set wrong. You can do it the hard way and find out on your own, or invest some money buying this book. There will be an immediate ROI. The book may also help planning the resources by finding out, what exactly is needed, both hardware and soft skills. I recommend "IBM Sametime 8.5.2 Administration Guide" to everyone who is new to Sametime, wants to upgrade from an older version and even to those, who already have a Sametime 8.5.x environment running. You will for sure find something in the book that is new to you.

Kurzbeschreibung The IBM Lotus Sametime 8.5.2 Administration Guide uses a practical, no-nonsense approach to give you the essential information you need. Using realistic scenarios, you learn how to configure and maintain your environment to meet your needs and take advantage of the flexibility offered in Sametime 8.5.2. If you are responsible for installing and administering Sametime 8.5.2, then this book is for you. If you're completely new to Sametime administration, this book will serve as your roadmap. If you're making the jump from a prior version of Sametime, then you'll see how Sametime 8.5.2 differs and how you work with the new configuration. Even if you already have Sametime 8.5.2 up and running, this guide will answer those questions you may still have of why and how the various server components work.

ber den Autor und weitere Mitwirkende Gabriella Davis lives in London, England and is Technical Director at The Turtle Partnership, an IBM Business Partner, for the past 16 years. Starting out as a cc:Mail administrator and a Lotus Agenda user she has continued to work with mail systems and Lotus software and has stayed true to her admin roots ever since. She now focuses on designing and tuning infrastructures and integrating mail and collaboration products for small and large enterprises alike. Her work also involves day-to-day support across the Lotus group of products for companies representing over 400 servers and 60 domains. Gabriella continues to enjoy the challenges of learning new technologies and sharing what she learns with others, either through presenting or writing, and is one of the IBM Lotus Collaboration Champion for Collaboration Solutions <https://www.ibm.com/developerworks/mydeveloperworks/profiles/user/GabDavis>. Gabriella's blog can be found on <http://blog.turtleweb.com>

Marie Scott is the Director of Email Services at Virginia Commonwealth University in Richmond, Virginia. She holds a bachelor of science in biology from James Madison University and a certificate in information systems from Virginia Commonwealth University. Marie has held dual advanced certifications in Notes/Domino administration and development since version 4.0, and she is an IBM Certified Advanced Security Professional for Domino. Marie began working with Lotus Notes in 1996, and she has worked in networking, systems integration, and email systems since 1987. Her primary interest is in Domino administration in complex environments. She has managed large email migration projects including a project transitioning university students to cloud computing. Marie is a speaker at conferences featuring IBM/Lotus technologies. Marie has written for The View (Wellesley Information Services) and with Tom Duff coauthored IBM Lotus Sametime 8 Essentials: A User's Guide (Packt Press, 2010). Marie is an IBM Champion for Collaboration Solutions: <https://www.ibm.com/developerworks/mydeveloperworks/profiles/user/MarieS...> Marie's blog can be found at: <http://crashtestchix.com>

Thomas Duff (also known as "Duffbert") is a software developer focusing on Lotus collaboration technologies in Portland, Oregon. He started working with Lotus Notes in 1996 in version R3 and has written and maintained hundreds of applications in large enterprises through the years. He also holds Lotus principal development certifications starting at version 4 and going up to version 8, as well as Microsoft and Java certifications. Tom is a prolific writer, both in various industry publications and at his website, Duffbert's Random Musings, at <http://www.duffbert.com>. He also is a frequent speaker at conferences and events focusing on Lotus technologies. Tom and Marie Scott coauthored IBM Lotus Sametime 8 Essentials: A User's Guide (Packt Press, 2010). Tom is an IBM Champion for Collaboration Solutions: <https://www.ibm.com/developerworks/mydeveloperworks/profiles/user/Thomas...>
