The definitive text...Von Phillip Taylor MBE[[VIDEOID:mo2B45D5MM3YAOR]]FOR PRACTITIONERS AT THE CONSTRUCTION BARAn appreciation by Phillip Taylor MBE and Elizabeth Taylor of Richmond Green ChambersIf you find life at the Construction Bar a tad challenging, this definitive text, published in this latest second edition by the Oxford University Press, should find itself permanently on your desk. Each of its twenty-seven

chapters -- which cover the full spectrum of insurance law for the construction industry -- is written by a variety of authors, all experts in this challenging and diverse area of law. The construction industry itself entails huge financial risk and considerable hazard for its workforce, as the authors point out in the introduction, adding with reference to the construction of the Gherkin in London, that in this risky enterprise, contractors and consultants share the chance of mistakes with the insurance industry. In an area of law dealing with long term projects usually valued in millions, this book, as the authors explain, is about how insurers and the construction industry share such risks. Distinguished for its clarity as well as its erudite and certainly practical approach, this book, in the words of its team of authors, is 'intended for lawyers, contracts managers, risk managers, insurers and brokers working on commercial projects within the construction industry.' In whatever aspect of the construction industry - and its insurers - you are professionally involved, you'll appreciate the book's logical four part structure in which the diverse topics covered are grouped under four main categories. As appropriate to its subject matter, the book is well constructed. Featuring numbered paragraphs and meticulous footnoting throughout, it has not only a detailed table of contents at the front, but an equally detailed list of contents at the beginning of each chapter. All this, plus the sixteen page index makes this particular work of reference exceptionally accessible and easily navigable, especially when you are under pressure and you need all the help you can get. And as you would expect, there are extensive tables of cases and legislation. Speaking of which, the book concludes with a final chapter on future changes in insurance law which, as its authors explain, looks very different from the similar chapter in the first edition following the progress made by the Law Commission to reform insurance law. As this process continues, the authors optimistically predict that 'the third edition of this book may be very different again....' Which means that, once you've perused this current edition, you'll no doubt look forward to its successor! Published in 2013 and updated to 31st August 2012, this new edition is supplemented by a website set up by the RPC in collaboration with the OUP, which will update you on issues pertaining to the book's content.
