Aussergewöhnliches BuchVon Marko StollmeierHier steht die Wahrheit des Universums, der Erde, Gttern und
Geistwesen drin, basierend auf echten Erfahrungen. Augen- u. Herzffner fr Jedermann.

KurzbeschreibungWhat would it take for you to accept that life is far more than what is merely seen? Have you ever wondered about the human evolutionary gap or why humans are so different from other species on Earth? If you are intrigued by such fundamental questions, then this book is for you. All across the planet, there is a growing number of children who spontaneously speak of previous lives, and know things that they seemingly could not know. This real eye-opener of a manuscript is concerned with such a child, and his spirit guide speaking through the 7-year-old, who gives a detailed account of extraterrestrial colonisation on Earth. A transcript of dialogues between the young boy and an unsuspecting therapist sheds new light on mankind's past, and this extraordinary child claims no less than having lived in an advanced civilisation on a distant planet of the Milky Way. A very direct and sometimes prophetic voice, the entity touches on a number of ever-relevant aspects of our lives, acquaints us with the incarnation process, and lends a hand to revealing a system based on false morality and a fabricated, anthropomorphic image of God. The child's previous experience aligns with the Law of One, that what affects one affects all. What is more, his reassuring take on reincarnation is a service to mankind, since with the realisation of the immortal nature of the soul comes release from the compulsive amassing of material wealth, as well as a deeper sense of responsibility for our actions. This young child's unlikely wisdom and maturity is radiant with uncomplicated purity, yet it certainly leaves plenty of room for doubt. What is certain is that the disclosed information conveys the untainted values of a spiritually evolved being. A transcript of dialogues that resonate with the inner truth of many, this profound revelation helps to divert your attention from being transfixed on life's trivialities to zoom out to see the greater picture and direct your steps with a new energy and optimism as you head into tomorrow. You are invited to share the amazement of author, or rather scribe, Aryana Havah through this astonishing encounter that has the power to crystallise your perceptions of who we are, where we came from, and where we are going.
