Detailreiches Werk ber die Geschichte japans HeeresluftwaffeVon Asterix DosoDas Buch enthlt alle wichtigen Informationen und mehrals das.Es ist in folgende Sektionen unterteilt:Seite 1-100 die Geschichte der japanischen Heeresluftwaffe.Seite 100-190 die Regimenter und ihre Flugzeuge.Seite 190-280 Biografien aller Asse, die 8 oder

mehr Abschnitte erreichen. Seite 280-340 Daten über die Piloten der JAAF, sowie Kartenmaterial und Details über Luftkämpfe an denen die japanische Heeresluftwaffe beteiligt war. Das Werk ist gut strukturiert und für Denjenigen der Details über die JAAF sucht bietet es eine wahre Fundgrube. Die Texte sind sehr sachlich und die Informationen mit Sicherheit ziemlich speziell. So genau will es der durchschnittliche Geschichtsinteressierte vermutlich gar nicht wissen.

Synopsis Originally published only in Japanese, this in-depth study provides an in-depth review of the fighter units of the Imperial Japanese Air Force and their pilots. Commencing with a detailed study of the development, equipment and operations flown by this force since its inception immediately after the end of World War I, until the catastrophic conclusion of World War II, the initial section deals with the wars in China and Manchuria, as well as the Pacific War of 1941-45. The second section provides details of each of the units from formation onwards, listing the types of aircraft used, the bases from which they flew, and the unit and formation commanders. Details of the more notable actions in which each unit was involved are also provided. Biographical notes relating to all of the more notable fighter pilots form the third section, whilst the book also provides supporting listings and a glossary of Japanese terms.
