Von Jess Roche : **Jaw-Dropping Geography: Fun Learning Facts About Stone Age: Illustrated Fun Learning For Kids (English Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Jaw-Dropping Geography: Fun Learning Facts About Stone Age: Illustrated Fun Learning For Kids (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Good as preparation or supplement for things learn in schoolVon Helpful AdviceFun Learning Facts About Stone Age written by Jess Roche is new installment in authors Jaw-Dropping Geography series that with the combination of illustrations and easy to understood text takes children on a journey through human history and present, helping kids to learn more about the planet we live.After Ancient Egypt and Greece, Australia, Antarctica, Great Wall of China and British History Celts, to name some of authors earlier works, Roche on 32 pages make concise but informative overview of Stone Age. He starts with the very beginning, answering the questions why this period of human history is called the Stone Age. Also from the beginning the author tries to clarify some words that might are self-explanatory for the adult reader, such as archeology, but for young readers apart from being difficult to pronounce, are completely unknown.The book is divided into 20 such small sections, each of them corresponding to one question related to the Stone Age, accompanied with a corresponding illustration or photograph that shows the section subject.Though this is the first installment in Roches series I read, interesting is the way in which the author presents complex phenomena and numerous information in a way that it will be appealing and intriguing to children and inspire them to further research.For this reason Fun Learning Facts About Stone Age I can primarily recommend the older preschool and younger school children (5-10 years old) as a preparation or supplement for things they will learn in school, though it wont be surprising if some older brother or sister reach for this booklet with respect to its content and interesting graphic solution presented by author.I was given a copy of this book by the author for the purpose of unbiased review, while all the presented information is based on my impressions.

KurzbeschreibungWelcome to the Jaw-Dropping Geography Series!TODAY ONLY - Get 4 Books for the price of 1! To thank you for downloading this book today - we will give you 3 MORE books for FREE!
