Von Ein Kunde
Ich kann dieses Buch jedem empfehlen, der ein gewisses technisches Verstaendnis fuer IP hat. Das Buch im Zusammenhang mit dem RFC3261 ermoeoglicht einen schnellen Einstieg in die Besonderheiten des SIP-Protokolls. Einziger Nachteil ist der extrem hohe Preis fuer ein so kleines Buch - dafuer spart man sich aber viel muehsames Suchem im RFC. Auch scheint die Bindung des Buches nicht besonders zu sein, in meinem Exemplar loesten sich schon nach kurzer Zeit einige Seiten.

Kurzbeschreibung
This newly revised edition of the ground-breaking Artech House bestseller, SIP: Understanding the Session Initiation Protocol offers a thorough and up-to-date understanding of this revolutionary technology for IP Telephony. Essential reading for anyone involved in the development and operation of voice or data networks, the second edition includes brand new discussions on the use of SIP as a wireless communications protocol and mobility technology. Professionals find details on the latest application areas such as instant messaging. The book explains how SIP is a highly-scalable and cost-effective way to offer new and exciting telecommunication feature sets. From an examination of SIP as a key component in the Internet multimedia conferencing architecture? to a look at the future direction of SIP, practitioners get the knowledge they need to design "next generation" networks and develop new applications and software stacks.

Synopsis
This revised edition of "SIP: Understanding the Session Initiation Protocol" gives you a thorough and up-to-date understanding of this revolutionary protocol for call signalling and IP telephony. The second edition includes brand new discussions on the use of SIP for wireless multimedia communications. It explains how SIP is powerful "rendezvous" protocol that leverages mobility and presence to allow users to communicate using different devices, modes and services anywhere they are connected to the Internet. You learn why SIP has been chosen by the 3GPP (3rd Generation Partnership Program for wireless cell phones) as the core signalling, presence and instant messaging protocol.
