**Von Rehan Zaidi : SAP ABAP Advanced cookbook (Quick Answers to Common Problems)** before purchasing it in order to gage whether or not it would be worth my time, and all praised SAP ABAP Advanced cookbook (Quick Answers to Common Problems):

KurzbeschreibungIn DetailABAP (Advanced Business Application Programming) is SAPs proprietary 4th Generation Language (4GL). SAP core is written almost entirely in ABAP.ABAP is a high level programming language used in SAP for development and other customization processes."SAP ABAP Advanced Cookbook covers advanced SAP

programming applications with ABAP. It teaches you to enhance SAP applications by developing custom reports and interfaces with ABAP programming. This cookbook has quick and advanced real world recipes for programming ABAP. It begins with the applications of ABAP Objects and ALV tips and tricks. It then covers Design Patterns and Dynamic Programming in detail. You will also learn the usage of quality improvement tools such as transaction SAT, SQL Trace, and the Code Inspector. Simple transformations and its application in Excel Downloading will also be discussed, as well as the newest topics of Adobe Interactive Forms and the consumption and creation of Web services. The book comes to an end by covering advanced usage of Web Dynpro for ABAP and the latest advancement in Floorplan Manager.

**Approach** This book is written in a simple, easy to understand format with lots of screenshots and step-by-step explanations.

**Who this book is for** If you are an ABAP developer and/or consultant looking forward to building advanced SAP programming applications with ABAP, then this is the best guide for you. Basic knowledge of ABAP programming is required.
