**Von Loren Abdulezer, Susan Abdulezer, Howard Dammond : Skype For Dummies** before purchasing it in order to gage whether or not it would be worth my time, and all praised Skype For Dummies:

KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. Really only covers the basics and no moreVon Mark O'NeillI am a Skype fanatic so I read this book hoping to find out some cool new trick or program. But after finishing it, I could see that this book was really only solely written for the real true dummy because it only covers the basics!Let's put it this way - if you have already set up Skype, started making calls, got yourself a decent headset and are chatting away on Skype chat, then you aren't going to get much out of this book (you can instantly chop away 80% of the pages). If on the other hand you've only just managed to download "Skypesetup.exe" and don't have a clue where to go next then this book is definately for you!The book IS well-written and I did find out a few things I didn't already know but if you already have a fair amount of knowledge about Skype, I

would recommend giving this book a miss.

Kurzbeschreibung See how to use Skype for secure chats and connect SkypeOut and SkypeIN. Here's the fun and easy way (r) to understand all the hype about Skype and make this cool alternative communication system work for you! You'll get great advice about hardware, directions for downloading and installing Skype, ideas for using Skype in your business, and the lowdown on making Skype calls to people with old-fashioned phones. Discover how to: Install Skype and start making calls Create a contacts list Set up voicemail and call forwarding Use Skype for worldwide conference calls and Skypecasting Enhance Skype with Bluetooth, Wi-Fi wireless, and video Kurzbeschreibung See how to use Skype for secure chats and connect SkypeOut and SkypeIN.
