The only Wingman novel I ever readVon Ein KundeHawk Hunter was once a captain in the United States Air Force when the Soviet Union attacked and created a radioactive wasteland from Oklahoma to the Dakotas called the Wasteland. After World War III ended with an unjust peace treaty signed by a traitorous vice president, the Soviet Union splits the

country in two creating the Circle in the east. The West Coast becomes Pacific America. Hawk Hunter's now an officer in the Pacific American Air Force. As the book opens, two mercenary pilots from an outfit called the Ace Wrecking Crew, one of whom is named Elvis, find a man tied up in the hot sun of the Azores, the site of a former American base, and he's left to die by two of Lucifer's henchmen. Hunter then heads to Casablanca, a city built on a movie set. He meets with an arms smuggler named Lord Lard. He also meets another man who says he's joining the fight against Lucifer. Lucifer had put a price on Hunter's head and everyone in this new world is out to collect the reward. Hunter soon meets the British members of the Gibraltar Defense Force, former RAF pilots who tell him that World War III never really ended. The book reaches its climax when Hunter and Lucifer confront each other in the Rhub-al-Khali. Hunter wants to bring Lucifer, whose real name is Viktor Robotov, a Soviet agent who created the Circle and started the Circle War. Hunter wants to bring Viktor back to the United States to stand trial as a war criminal but he's killed by Nazis. Elvis and his partner call him. He asks about the people from the carrier that they'd salvaged to stop Lucifer from breaking out into the Mediterranean. They say they didn't survive.0 von 0 Kunden fanden die folgende Rezension hilfreich. GREAT STORY, ACTION FILLED, AND FULL OF MILITARY STUFF! Von Ein Kunde I read this book straight through. Hunter must now help RAF guys tow a disabled nuclear aircraft carrier through the Med to the Suez Canal to stop Viktor. Great book!
